ABOUT ME

- Aspiring Data Scientist with hands-on experience in machine learning and data analysis
- Skilled in building real-world ML applications using Python and backend frameworks
- Focused on solving data-driven problems and developing scalable solutions

EXPERIENCE

Self-Initiated Data Science Projects

Independent Developer | 2025 – Present

Book Recommendation Engine

- Built a personalized recommendation engine using collaborative filtering
- Processed and analyzed datasets using Pandas and NumPy
- Implemented similarity algorithms for relevant recommendations
- Optimized data preprocessing for improved performance
- Code available on GitHub for reproducibility and testing

Tech Stack:-Python, Pandas, NumPy, Scikit-learn

Local Document Search Engine

- Developed a document retrieval system for fast and accurate local search
- Implemented indexing to optimize search efficiency and reduce query time
- Built APIs using FastAPI/Flask for handling search queries
- Applied TF-IDF vectorization and text processing to improve search relevance
- Code available on GitHub for reproducibility and testing

Tech Stack :- Python, FastAPI/Flask, TF-IDF, NLP

TECH STACK

- **Programming:** Python, SQL, R
- **Libraries:** Pandas, NumPy, Scikit-learn, PyTorch
- **ML/NLP:** Machine Learning, TF-IDF, NLP
- **Backend:** FastAPI, Flask
- **Frontend:** HTML, CSS, JavaScript, Svelte
- **Tools:** Git, GitHub

EDUCATION

Shivaji University | 2021 - Present

BCA (Batchelor of computer application)

- CGPA: 8.7
- percentage: 82%

Raje Ramrao MahaVidyalaya | 2019 - 2020

HSC - science(PCMB)

- CGPA: 8.7
- percentage: 80.69%

ACHIEVEMENT

- Achieved 1st Place in Web Development Hackathon by designing a scalable web application
- Participated in UIDAI Data Hackathon 2026, solving real-world data problems
